

[RP Presents: Representation in Radiology - Our Diverse Future](#)

Radiology practices continue to recognize the importance of diversity, equity and inclusion in medicine, but recruiting a diverse physician workforce can be a challenge—particularly as Black, Indigenous and People of Color (BIPOC) medical students often choose other specialties. In our latest webinar, “RP Presents: Representation in Radiology - Our Diverse Future,” an expert panel discussed their personal paths that led to radiology and offered important insights for rising physicians to consider when choosing a specialty.

The discussion was moderated by Dr. Andrea Birch, a diagnostic radiologist, Associate Professor of Clinical Radiology and Radiological Sciences at Vanderbilt University School of Medicine and Director of the Office of Diversity and Inclusion for Vanderbilt University Medical Center; and featured four outstanding panelists: Tina Chatterjee, a medical student and President of the Radiology Interest Group at Meharry Medical College, co-leader of the Annual American College of Radiology (ACR)
